# MOHD IRFAN NADZIRI BIN MOHD ZAKI

Cloud DevOps Engineer • Solutions Architect

Open to roles: Cloud, DevOps, and Platform Engineer • Solutions Architect

Cyberjaya, Malaysia
**Email:** works@irfanadziri.dev • **LinkedIn:** linkedin.com/in/irfanadziri • **Phone:** +6012 346 0872

## PROFESSIONAL SUMMARY

AWS-certified Cloud and DevOps Engineer with 2+ years of hands-on experience operating production-grade infrastructure on AWS, and Azure. Specializes in IaC with Terraform, GitOps-based deployments with ArgoCD, CI/CD pipeline engineering, and cloud security compliance. Experienced in operating EKS and ECS workloads at scale within enterprise environments. Seeking senior DevOps, Platform, or SRE roles focused on automation, reliability, and developer velocity.

## PERSONAL AND WORK EXPERIENCE

**BMW GROUP** — Cyberjaya
AWS Technical Engineer — *April 2025 – Present*

- Designed and deployed AWS cloud infrastructure, implementing Multi-AZ architecture, Auto Scaling Groups (ASG), and Disaster Recovery (DR) strategies to support 20+ workloads with 99.99% uptime.
- Automated infrastructure provisioning using reusable IaC templates and Terraform modules, reducing manual deployment time by 80% and improving configuration consistency across 3 environments.
- Led cloud onboarding and migration projects for internal application teams, ensuring 100% adherence to project timelines and smooth adoption of AWS services.
- Engineered multi-stage CI/CD pipelines using GitHub Actions with environment promotion gates (DEV→QA→PROD), secrets scanning, and container image signing via ECR; reducing deployment errors by 60% across 3 application teams.
- Operated and maintained production EKS clusters using ArgoCD for GitOps-based continuous delivery, managing workload health, rollbacks, and deployment observability via k9s across multiple application namespaces.
- Conducted quarterly DR exercises with multiple teams to validate DR readiness and meet RTO/RPO targets.
- Maintained centralized observability for ECS/Fargate workloads using CloudWatch Logs, custom metrics, and alarms; reducing mean incident detection time by 30%.
- Monitored containerized workload performance and resource utilization on EKS using Grafana dashboards, identifying degraded services and coordinating remediation with application teams.
- Managed patch compliance and vulnerability remediation across 200+ EC2 instances and containers, triaging CVE findings from Wiz and driving resolution within SLA to maintain security posture.
- Authored and maintained 3 technical runbooks covering DR execution, onboarding, and operational procedures, improving process consistency and reducing incident response time by 30%.

**KOMETSOFT (M) SDN. BHD.** — Putrajaya
Solutions Architect — *January 2024 – April 2025*

- Conducted AWS infrastructure assessments for an organization with 10+ workloads, identifying risks and optimization opportunities that improved infrastructure stability, cost efficiency, and security compliance by 50%.
- Assisted and advised three application teams (10+ developers and engineers) in migrating workloads to an AWS Landing Zone, ensuring successful completion within the designated timeline.
- Involved Landing Zone deployment for a government ministry, implementing AWS Service Control Policies (SCP), AWS Config, and security best practices, reducing manual infrastructure provisioning time by 60%.
- Designed and deployed cloud infrastructure using IaC with AWS CloudFormation, featuring Multi-AZ architecture, Auto Scaling Groups (ASG) for high availability, and AWS WAF for security, enhancing system uptime to 99.99%.
- Partnered with development teams to optimize cloud-native application deployments, reducing deployment errors by 70% and cutting release cycles from 2 weeks to 3 days.
- Created and developed an AI-driven chatbot application for customer support, currently in beta stage and attracting significant interest from various parties.

**FINAL YEAR PROJECT** Selangor Islamic University
Implementing UIS Guard Patrolling System in a Cloud-based Infrastructure *January 2023 – October 2023*

- Designed and deployed a cloud-based IoT infrastructure on AWS using IoT Core, Lambda, DynamoDB, RDS, and VPC; handling real-time data ingestion, processing, and storage end-to-end.
- Created a web-based platform with PHP and Boostrap 5.3 to monitor patrolling schedules and data.
- Utilized Python to develop an AWS Lambda function for real-time data processing.

## EDUCATION AND CERTIFICATION

**AMAZON WEB SERVICES (AWS)**
AWS Certified Solutions Architect - Associate (SAA-C03) *Expiry: August 2027*
AWS Certified Cloud Practitioner (CLF-C02) *Expiry: August 2027*
AWS Certified AI Practitioner (AIF-C01) *Expiry: December 2027*

**SELANGOR ISLAMIC UNIVERSITY (UIS)**
Bachelor in Information Technology (Hons.) (Network Technology) (CGPA 3.96) *Graduation: June 2024*

- Holder of UIS Chancellor's Award - Convocation 2024/2025.
- Best Student of Computer Science Department Award.
- Faculty of Creative Multimedia and Computing Student Figure Award.

## SKILLS

**Cloud & DevOps:** AWS (EC2, Lambda, S3, CloudFormation, Auto Scaling, IAM, WAF, VPC, SCP, Config, ECS, EKS), Azure (VM, VNet, Storage, Managed Disks)

**Container Orchestration:** ECS/Fargate, Kubernetes (EKS), Docker, e1s, k9s

**CI/CD & Automation:** Git, GitHub Actions, Terraform, ArgoCD

**Observability:** CloudWatch, Grafana, AWS Log Insights

**Infrastructure & Security:** Linux, Bash, PowerShell, IAM, AWS Security Hub, CloudTrail, GuardDuty, Wiz

**Programming & Web:** Python, JavaScript, Typescript, React.js, Vue.js, Tailwind CSS
